V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	3-5	YES
	Claims	2	NO
Inventive step (IS)	Claims	3-5	YES
	Claims	2	NO
Industrial applicability (IA)	Claims	2-5	YES
	Claims		NO

2. Citations and explanations

Document 1: EP 262399 A2 (Takeda Chemical Industries, Ltd.), 06 April 1988

(Document 1 was cited in the international search report)

Document 1 discloses the compounds that are set forth in claim 2 of this application (refer to claim 21, page 17, compound 3-b).

Therefore, claim 2 lacks novelty and does not involve an inventive step.

In addition, the applicant responds that the amendments, which were submitted along with the documents dated 22 October 2003, delimit the scope of claim 2 as originally filed, which was determined to be novel and involve an inventive step. However, whereas the compounds set forth in claim 2 as originally filed were the compounds set forth in claim 1 as originally filed wherein the ring (B) was present, the ring (B) is not necessarily present in the compounds set forth in amended claim 2; therefore, the abovementioned amendments do not merely delimit claim 2 as originally filed, which was determined to be novel and involve an inventive step.

The compounds set forth in claims 3-5 are not disclosed in any of the documents cited in the

international search report or in any document that is considered to be related to the invention in question, and are not obvious to a person skilled in the art.

Therefore, claims 3-5 are novel and involve an inventive step.
